EXECUTIVE SUMMARY

TITLE: Purchase Decorative Downtown Street Lights

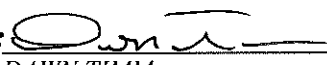

BACKGROUND: The quantity of decorative street light poles and fixtures in our inventory was recently reduced following a replacement project. In review of our current inventory levels, it was determined that six decorative street light poles and fixtures need to be ordered to replenish our inventory of this item. The new fixtures will be furnished with the Utility's standard energy efficient LED lamps.

In 2000, the City selected a decorative street light pole and fixture that would be used in the downtown area as well as other strategic areas throughout the City. The pole and fixture that was selected is provided by Spectrum Lighting and Controls and they are the sole-source provider for this standard inventory item.

FISCAL IMPACT: \$23,454 to be derived from Hartford Electric user fees.

RECOMMENDATION: To purchase six decorative street light poles and fixtures from Spectrum Lighting and Controls for a cost not to exceed \$23,454.00.
